MEMORANDUM FOR: See Distribution

SUBJECT: Community Working Group on Inflation ☐

25X

The recent fluctuations in the inflation rate have raised concern over the techniques used by the various programs in the NFIP to adjust budget estimates to anticipated cost increases. A review of current procedures and possible revised approaches are needed to ensure the protection of future buying power.

☐

To accomplish this, we are establishing a community working group on inflation chaired by my associate deputy, ☐ The group's task is to:

25X

- o Identify aggregate cost categories that accurately summarize NFIP expenditures. These categories will be detailed only to the extent necessary to develop a unique NFIP "market basket".
- o Use appropriate forward pricing techniques for indexing these categories to inflation so that specific deflators may be included in fiscal guidance and budget development instructions.
- o Establish procedures for the routine exchange of inflation information. ☐

X1

This working group will meet for the first time within the next two weeks and will have June 1981 as a target for completion of its work. Jim will be contacting each of you to ask that you name a representative to the group, preferably at the comptroller or equivalent level. ☐

Attached is a revised memo establishing a Community Working Group on Inflation. We believe it addresses the major concerns raised at last week's meeting. Specifically, [] has expressed concern that prior formulations: 1) threatened to impose whole new cost accounting procedures on the Community, and 2) committed us to coming up with new NFIP-wide deflators when current practices, made more explicit, might be better. We believe this language addresses these concerns and recommend that you pass this to John for signature.

Ho 8 - revised per our conversation of last Friday.
